BIO-GUT

Description

Probiotics are defined as live micro organisms that when administered in adequate amounts confer a health benefit on the host.

Lactobacillus are a group of rod shaped gram positive non spore forming bacteria. Lactic acid producing bacteria are the most used probiotics as a feed additive in shrimp culture. It is well known that probiotics have a number of beneficial health effects in shrimp culture. They play an important role in the protection of the host against harmful micro organisms and also strengthen the immune system.

Benefits

- ▶ Prevents and Control Pathogenic bacteria
- ▶ Helps in faster growth and increases profitability.
- ▶ Improved gut micro flora
- ▶ Helps in better feed digestion

Composition

- ▶ Lactic acid bacillus fortified with multi enzymes fortified with astaxanthin

Dosage

- ▶ 10gms/kg of feed or as advised by aquaculture Consultant

Presentation

500gms Pack

Application

Mix 10 gms of Bio-Gut with 20ml of water and mix equally to one kg of feed. Apply 30ml of Minbind as binder /kg of feed and dry the feed
