

Zeolites with highest CEC

FEED SUPPLEMENT

NIVARAN-WF

Description

Herbal extracts have a great potential as immunostimulants in aquaculture because they can be easily prepared at low costs. They act against a broad spectrum of pathogens and parasites.

Herbal immunostimulants, also known as immunomodulators are substances that stimulate the immune system by inducing activation or increasing activity of any of its components.

The natural plant products have various properties such as anti stress, Appetizer and anti microbial. Some plants / herbs are rich sources of compounds such as volatile oils, saponins, phenols, tannins, alkaloids, polysaccharides and polypeptides.

Benefits

- Nivaran-WF Being a herbal formulation is safe to use without any residual effects.
- Stimulates natural immunity and protects shrimps from pathogens
- Helps and controls white feces and protects hepatopancreas.
- Improves feed digestability, increases mineral absorption and feed intake
- Improves overall health of shrimp and muscle quality.
- Improves growth rate and survival
- Lowers F.C.R. and increases profitability

Composition

- Method of application: Mix required quantity of Nivaran-WF to the feed and dry it for 90 minutes.
Note: No Binder required in the process.

Dosage

- **Regular dosage:** 20 ml/kg of feed, two meals a day
- **During white feces infection:**
30 to 40 ml/kg of feed, two meals a day for five days
(or) as advised by aquaculture consultant.
