

A Concentrated Mineral Mixture

FEED
SUPPLEMENT

S-MIN

Registered with CAA as Antibiotic Free
Product Regn. No.CAA/M16/FA/00471

Description

There are about 20 inorganic minerals which are considered to be essential to animal life including fish and shrimp. The essential minerals are usually classified into two main groups according to their concentration in the animal body. The macro and micro nutrients minerals are essential constituents of skeletal structures such as shell and bones. Minerals play a key role in the maintenance of static pressure. Minerals serve as structural constituents of soft tissues. Minerals play a vital role in the acid base equilibrium of the body and thus regulates the pH of the blood and other body fluids.

Benefits

- S-Min helps in increasing the growth rate of shrimp
- S-Min prevents cramp symptoms
- S-Min maintain optimal water quality parameters such as alkalinity, pH and hardness
- S-Min increases the moulting frequency
- S-Min helps in better shell formation
- S-Min increases the survival rate

Composition

- S-Min contains concentrated macro and micro nutrients such as Calcium, Magnesium, Potassium, Sodium, Chlorine, Manganese, Zinc, Phosphorous, Iodine, Copper etc.,

Dosage

- 10 kg/acre, once in every 15 days
or
as advised by aqua consultant

Presentation

10 kg & 25kg Pack
