

Immunostimulant & Growth Promoter

Shrimp & Fish Care

FEED
SUPPLEMENT

BIOMED-IMG

Registered with CAA as Antibiotic Free
Product Regn. No.CAA/M16/IMMu/00467

Description

Shrimps lack true adoptive immunity and it solely depends on the primitive immunity called Innate immunity. However various innate molecules and mechanisms are identified in the shrimp that plays a potential role against invading bacterial, fungal and viral pathogens. Some of the molecules that can trigger the innate immunity are vitamin-c, pigments, 1-3, beta glucons lipopolysaccharides, mannanoligosaccharides etc.,

Biomed IMG is a combination of minerals, vitamins, immunostimulants, probiotics and essential natural extracts.

Benefits

- Biomed IMG stimulates non specific immune or innate immune system in the shrimp
- Biomed IMG decreases bacterial loads such as vibrio in shrimp gut
- Biomed IMG decreases viral loads in the shrimp gut
- Biomed IMG prevents cramp symptoms in shrimp
- Biomed IMG Improves overall growth and survival
- Biomed IMG lowers FCR and increases productivity
- Biomed IMG eliminates usage of Antibiotics

Composition

- Mixture of Multi vitamins, Minerals, 1-3, 1-6 beta glucons, MOS, spirulina, probiotic bacteria and essential natural extracts.

Dosage

- 5gm/kg of feed. 2 meals a day.
or
as advised by aquaculture consultant.
