SUPPLEMENT**

BIOSOFT PULS

Description

EDTA is an Aminopolyboxilic acid. It is colourless and soluble in water.

EDTA is available in two forms, disodium

EDTA and calcium disodium EDTA.

EDTA plays a key role in reducing hardness.

Benefits

- BIO SOFT PLUS initiates moulting
- BIO SOFT PLUS removes calcareous deposits on the exoskeleton
- BIO SOFT PLUS cleans external parasites
- BIO SOFT PLUS adjusts hardness levels
- BIO SOFT PLUS maintains alkalinity which helps to promote plankton growth

Composition

- Magnesium Disodium EDTA and Calcium Disodium EDTA with a chelation value more than 300 ppm

Dosage

1 to 2 kg/acre,
or
as advised by Aquaculture consultant

Presentation

1 kg & 5 kg Pack
