

Herbal immunostimulants are natural plant-based compounds that help strengthen the immune system of animals, increasing their resistance to diseases and improving overall performance. Their usage is becoming increasingly popular in livestock and poultry production as a safe alternative to antibiotics and synthetic drugs.

Advantages of BioLiv-V

**Natural
and Safe**
(no antibiotic
residues)

**Cost -effective
in the long run**

**No
withdrawal
period**

**Compatible
with vaccines
and other health
programs**

We, at Biomed follow advanced extraction and standardisation techniques to preserve natural potency while ensuring safety and consistency

Role of **Bioliv-V** in Animals (Cattle, Buffalo, Sheep, Goats) :

A **Stimulation of Immune Response**

Herbal compounds activate both humoral and cell-mediated immunity. They help in increasing the production of antibodies and enhance the activity of immune cells (e.g., macrophages, lymphocytes).

B **Prevention of Common Diseases**

Herbs present in Bioliv-V (Eclipta alba, Moringa oleifera, Andrographis paniculata, Phyllanthus amarus, Tephrosia purpurea, Hibiscus cannabinus, Passiflora foetida, Terminalia chebula) boost resistance against diseases such as

✓ Mastitis

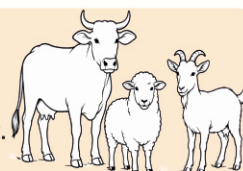

✓ Foot and mouth disease

✓ Theileriosis

C **Improved Performance**

Better appetite, feed conversion and growth rate.

Quicker recovery from stress during calving, vaccination or transport.

Role of Bioliv-V in Poultry:

A **Enhanced Disease Resistance**

Strengthens birds immunity against viral and bacterial infections like

★ Newcastle disease ★ Infectious bursal disease ★ Coccidiosis

B **Better Vaccine Response**

Herbal immunostimulants improve the efficacy of vaccines, leading to higher antibody titers.

C **Reduction in Mortality and Morbidity**

Birds recover faster and have lower mortality during disease outbreaks or environmental stress.

D **Superior Gut Health**

Live beneficial microorganisms that boost gut health, nutrient absorption, immunity, lower disease incidence, support milk yield and quality.

E **Growth and Production Benefits**

Better weight gain and feed conversion ratio (FCR).

Improved egg production in layers and breeder flocks.

Composition

Extracts of :

Eclipta alba175 ml
Moringa oleifera150 ml
Andrographis paniculata125 ml
Phyllanthus amarus100 ml

Tephrosia purpurea100 ml
Hibiscus cannabinus 100 ml
Passiflora foetida 150 ml
Terminalia chebula 100 ml
Preservatives QS

✓ **Bioliv-V is a carefully designed synergistic blend of various exotic plant extracts .**

✓ **Each extract is selected for it's unique bio active properties .**

Indications

For optimizing liver function,
anorexia due to hepatic disorders,
liver disfunction post deworming, stress on liver,
for improving productivity,
digestive performance & FCR

Dosage:

For Cattle & Buffalo 50ml twice daily
Sheep & Goat 15 to 20ml twice daily

Dosage / 100 Birds :

For Poultry : Chicks 5 ml, Growers 10 ml,
Layer/ Broilers 20ml, Breeders 40ml
